Poof can parse a variety of different kinds of passage references, export your story content to Twee, PDF, and Twine 2 archives, and it includes several tools to help you manage, find, and organize your passages.

Poof allows authors and editors to make, save, export, import, and share comments. You can create comments on each passage to make notes about changes you want to make, mistakes that need fixed, and other problems. Poof also allows you to view your CSS and JS, the latter of which can be linted!

Using the passage references, you can also click through your story to read it in order, or to follow along while you play it.
